think • go climate conscious

atmosfair

Certificate

for reducing greenhouse gas emissions

JVB Travel AS
has saved **106,534 kg** of CO_2 greenhouse gases
with atmosfair on Sep 16, 2026.

What does your climate protection contribution accomplish?

With your climate protection contribution in the amount of 2,663.00 Euro, you are supporting the following projects:

Clean electricity from solar plants in Senegal

Your contribution will enable Senegalese households to be supplied with reliable and sustainable solar power all year round.

Biogas from cow dung in Kenya

Your contribution supports small farmers in building biogas plants that convert manure into gas. This enables smoke-free cooking and reduces CO_2 emissions.

Rural electrification in Mali

With your contribution, more villages in Mali can be electrified for the first time and supplied with green electricity.

All atmosfair projects are double registered under the Clean Development Mechanism (CDM) of the United Nations Framework Convention on Climate Change (UNFCCC) and additionally under the Gold Standard for the Global Goals of the Swiss Gold Standard Foundation.

With your climate protection contribution (not compensation), you are promoting the development and expansion of renewable energies in developing countries. The project countries credit themselves with the emission reductions.
